Hiring Manager
Capital.com,
London, UK.

Dear Hiring Manager,

I am writing to express my interest in the **SRE Engineering Manager** position at **Capital.com**, as I believe my extensive expertise in SRE & Performance Engineering aligns seamlessly with the requirements and ethos of your esteemed organization.

With over 17 years of diverse experience across Java Spring Boot-based microservices development, performance engineering, and crafting resilient applications for a wide spectrum of industries, including BFSI, healthcare, technology, insurance, communications, and retail, I am enthusiastic about the opportunity to contribute my skills to **Capital.com**

Throughout my career, I have excelled in devising robust strategies for optimizing application performance and reliability on leading cloud platforms such as Amazon Web Services, Red Hat Open Shift and Pivotal Cloud Foundry. I have led teams and collaborated extensively on initiatives ranging from SRE implementation, performance benchmarks and optimization, chaos engineering, observability including logging and tracing to driving site reliability frameworks for critical platforms.

The experiences gained from shaping robust architectures, defining SLO/SLIs, conducting FMEA, optimizing resource bottlenecks, and mentoring teams have honed my ability to navigate complex challenges effectively.

Future's commitment to lead by example and taking ownership, resonates deeply with my professional goals. I am excited about the prospect of bringing my skill set in agile delivery, DevOps, and continuous integration/continuous delivery practices to your team, contributing to the company's growth and success.

I am enthusiastic about the possibility of discussing how my background, skills, and passion align with the needs of **Capital.com**. Thank you for considering my application. I am looking forward to the opportunity to further discuss how I can contribute to your team.

Warm regards,
Sharad Jhingran
